

INDUSTRY-LEADING  
TEXTILE-TO-TEXTILE  
RECYCLABLE CLOTHING

CLOTHING  
THAT  
WORKS

TODAY &  
TOMORROW

**“IN THE UK ALONE, 300,000 TONNES OF TEXTILE ITEMS ARE DISCARDED INTO HOUSEHOLD WASTE, INCLUDING POLYESTER. UP UNTIL NOW, POLYESTER THAT HAD NO USEFUL LIFE LEFT WOULD HAVE BEEN DISPOSED OF. WITH THIS PROJECT, WE CAN NOW SAVE THAT WASTE AND RETURN IT TO SUPPLY CHAINS.”**

*TIM CROSS, CEO AND FOUNDER AT PROJECT PLAN B AND THE CIRCULAR TEXTILES FOUNDATION*

## Why are we doing this?

Our vision is to close the loop of circularity with a textile-to-textile recycling system that prevents garments ending up in landfill or with no valuable use. Many recycling systems only manage to re-purpose complicated multi component garments into other products such as insulation, sound proofing, or other soft textile items, which is known as down-cycling.

Recycle.me is industry leading, specifically designed for recyclability. Using mono-fibre fabric and simplified trims that allows it to be successfully recycled via mechanical processing into pellet which can be made back into new textile garments.

Whilst this range is still produced with the same quality and durability that is central to all Regatta Professional garments, we want to ensure that when Recycle.me garments do eventually reach the end of their life, they can be responsibly recycled and their value retained.

## Our Partners

We have partnered with the Circular Textiles Foundation, Salvation Army Trading Company and Project Re:claim on our new Recycle.me range, to certify the range as recyclable and put a system in place that will prevent the garments ending up in landfill or incineration.

### Circular Textiles Foundation (CTF):

The CTF are on a mission to lower the impact of clothing by designing it so it can be recycled. They are the only UK organisation to offer verification and certification in garment recyclability.

Our Recycle.me range has been awarded their 'Infinitee' mark, providing third party assurance the products have been designed to be recycled.

### Salvation Army Trading Company (SATCoL):

SATCoL is the largest charity-owned textiles collector in the U.K actively working to support organisations reduce their carbon footprint and combat climate change.

We've partnered with SATCoL to implement a free tuckback scheme for customers of our Recycle.me range.

### Project Re:claim:

Project Re:claim is the UK's first polyester recycler designed for fibre to fibre. They transform post-consumer textile waste into rPET pellets that can be spun back into yarn.

Our Recycle.me range uses 100% polyester mono-fibre fabric and trims to ensure it can be recycled through their mechanical recycling system.

# How to Recycle Your Garments

## 1. Scan the QR Code

Find the QR code printed inside your garment and scan it with your phone.

## 2. Download Your Shipping Label

Enter your details online to generate and download your free shipping label.

## 3. Drop It Off

Package your garment and take it to your nearest designated drop-off point.

## 4. Close the Loop

Your garment will be recycled through our circular solution, in partnership with SATCoL and Project Re:claim.

## What Can You Recycle?

- Only Recycle.me garments can be sent back via the takeback scheme
- Garments must be cleaned before posting
- Garments can be decorated thanks to our partnership with SATCoL \*see page 6

# How Project Re:claim recycle your clothing

## Designed for Recycling

Garments entering the recycling machine need to be 100% polyester mono-fibre.

## Shredding

End of life polyester garments are shredded into small pieces.

## Melting

The shredded fabric is melted down into a PET lump.

## Pelletising

The melted material is cooled and cut into tiny PET pellets.

## New Yarn Creation

The pellets are supplied back into the textile industry, where they're spun into new yarn - ready to create new products.

# Can you decorate Recycle.me Garments?

Yes, Recycle.me garments can be decorated thanks to our partnership with SATCoL. Regatta Professional recommend that these garments use either embroidery or DTF printing methods. This is because both of these methods can be recycled.

## Embroidery

- 100% polyester thread
- 100% polyester backing

## DTF Printing

- Water based inks
- PET powder
- CO-PES adhesive

Through our partner SATCoL all branded garments received via the take back scheme will have full brand protection through the recycling process to the point of destruction.

## FAQs

### When can I return my garments?

Recycle.me garments can be posted off at end of life, there is no set time scale on this as they are designed with durability in mind.

### How many garments can I return at once?

You can recycle up to 15kg in 1 parcel. Maximum parcel size: 41x38x64cm. You can send as many parcels as needed. For large scale collections over 500kg please contact [projectreclaim@satcol.org](mailto:projectreclaim@satcol.org)

### How do I know my garment has been recycled?

Once garments have been posted and received by SATCoL you will receive an email which will be confirmation that your garments have been received into the recycling process.

### Is this process reported as a business?

Yes, Regatta Professional will be working with SATCoL to record the number of garments received through the take back scheme.

### Can my garments be rejected?

Yes, garments can be rejected if they are heavily soiled or garments that are not part of the Recycle.me range are sent back. Items received that fall outside the Recycle.me range will be assessed at SATCoL for suitable reuse or other recycling options.

### Who can recycle?

Currently this take back scheme can only be used across the UK and Northern Ireland. Project Re:claim is the only 100% polyester recycling plant working in textile to textile on a commercial scale.

# Recycle.me Thermal Jacket

TRA954

Sizes XS-3XL (EU 42-62)

Recyclable clothing - designed for circularity using mono-fibre fabric & trims

100% polyester water repellent fabric

Reinforcement panels in ripstop fabric

WARMLOFT performance technology insulation

Full length zip with inner zip & chin guard

2 lower secure envelope pockets

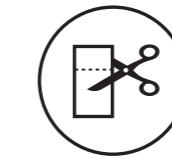

Adjustable cuffs with hook & loop fastening

Internal security pocket

Circular designed 100% polyester zip, concealed in lining for embroidery access

This product has no external logo branding

Refer to decoration guide for recommended branding application

**WATER**REPELLENT

# Recycle.me Softshell Jacket

TRL204

Sizes XS-3XL (EU 42-62)

Recyclable clothing - designed for circularity using mono-fibre fabric & trims

Polyester softshell fabric with mechanical stretch

Wind & water repellent fabric

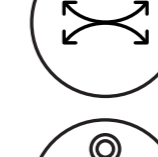

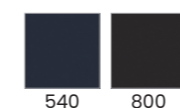

Warm backed woven softshell

Reinforcement panels in ripstop fabric

2 lower secure envelope pockets

This product has no external logo branding

Refer to decoration guide for recommended branding application

SOFTSHELL WATERREPELLENT

# Recycle.me Fleece

TRF817

Sizes XS-3XL (EU 42-62)

Recyclable clothing - designed for circularity using mono-fibre fabric & trims 210 series microfleece  
Super soft handle

Reinforcement panels in ripstop fabric

Quick drying & easy care

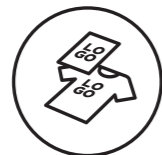

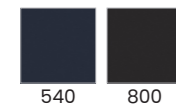

Lightweight & easy to wear

2 lower secure envelope pockets

Full length zip with inner zip & chin guard

This product has no external logo branding

Refer to decoration guide for recommended branding application

**SYMMETRY**

# Recycle.me Pique Polo Shirt

TRS331

Sizes XS-3XL (EU 42-62)

Recyclable clothing - designed for circularity using mono-fibre fabric & trims

Polyester pique fabric

Good wicking & quick drying properties

Ribbed collar & cuff with edge tipping

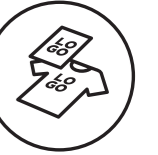

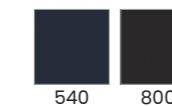

2 button placket with contrast colour details

Taped back neck seam for extra comfort

Easy care

This product has no external logo branding

Refer to decoration guide for recommended branding application
